

FRAÎCHEUR L

Highly Concentrated Fragrance Solution for Perchloroethylene

Properties:

FRAÎCHEUR L is a fragrance solution to be added to the drycleaning bath or a special finishing treatment. **FRAÎCHEUR L** contains special fragrance components.

Textiles treated with **FRAÎCHEUR L** receive a fresh and absolutely neutral fragrance. Due to the special combination of fragrances, unpleasant odours like smoke, perspiration, urine, corporal or food smell are covered. **FRAÎCHEUR L** prevents the transfer of unpleasant odours onto other textiles.

This appealing fresh fragrance also spreads around the work place and in the shop.

FRAÎCHEUR L is well filterable and without problem in distillation.

Application:

Subject to observation of the following dosage, **FRAÎCHEUR L** is perfectly compatible both with drycleaning detergents and retexturing (sizing) agents, water repellent agents or other finishing products.

Application concentration in the drycleaning bath:

Dosage: 2 to - 5 ml of **FRAÎCHEUR L** per 10 litres of solvent
To be added to the freshly distilled bath.
(work tank and filter content)

According to the desired freshness effect and the consumption of the fragrance solution in the bath:

Dosage: 1 to 2 ml of **FRAÎCHEUR L** per 10 litres of solvent
